PHORCE (PCIe version)

PRODUCT BRIEF

The PHORCE product family is designed to extend the SuperSpeed USB3.0 connections beyond the typical 3 meter reach of copper cables. The unique feature of PHORCE family is its transparent operation. The connected remote USB devices appear as local devices to the host PC. PHORCE system consists of a PHORCE-PC card, which is installed in the PCIe slots in the host computer, and a PHORCE-RE box, which provides two USB3.0 root hub ports at the remote site of the application. The remote USB ports comply with USB3.0 specifications and are backward compatible with USB2.0 devices and platforms. PHORCE also works with USB3 Vision cameras for machine vision applications.

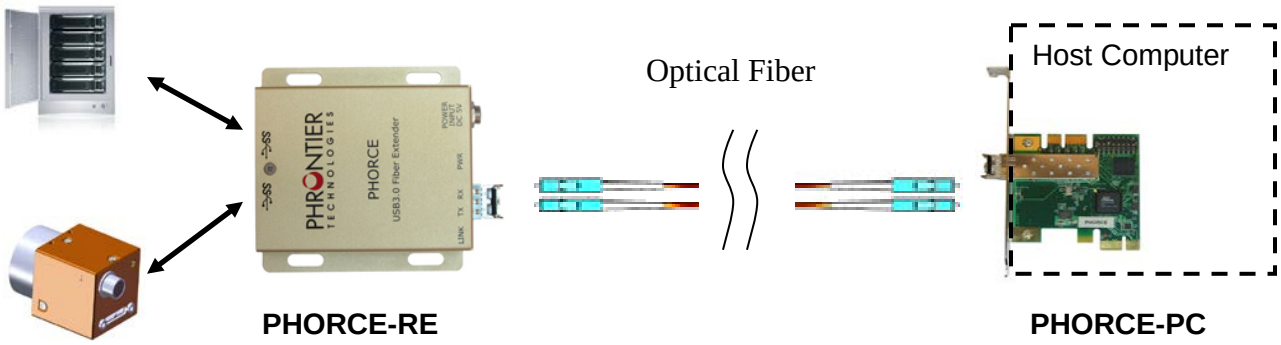
TYPICAL SET UP DIAGRAM



PHORCE-RE **PHORCE-PC**

Note: *Operation requires certain power-up sequence. The RE side must be powered on before the PC side while the optical link is connected. If the optical link is interrupted during operation, after the optical link is re-connected the system needs to be re-started with the correct power-up sequence.*
