

**Field-of-view:
 Discover more, faster**

Great instruments don't create great science, but they are essential to telling the story. QImaging puts the right tool in your hands when the goal is fast, sensitive imaging and documentation in true plug-and-play fashion. With the QImaging Retiga R6, you get a 6.0 MP camera that fits more into your field of view. For time lapse, tile-and-stitch or stereo microscopy, the Retiga R6 will accelerate your discoveries.

The Retiga R6 is packed with advanced technical features that improve limits of detection and quantification. The camera generates large amounts of data, but handles it smoothly via the new super speed USB 3.0 interface.

Inside the R6 camera, QImaging introduces Intelligent Quantification™ - on camera intelligence features that correct for defective pixels. Fast 50 MHz pixel digitization increases camera frame rate to give you the speed you need to handle all the pixels in the Retiga R6.

A great camera deserves great software for acquisition - it's the way you interface with your data. Ocular™ is the all new imaging platform that's ready to become your go-to capture program. Built around controls you are already familiar with, it will be love at first click.

Scientific cameras are the cornerstone of the highest performing imaging instruments in a lab. Through careful selection of image sensors and components, the R6 will redefine your expectations, even for routine applications. You will not find a more capable large FOV camera on the market for this price... Call us to demo one today.
